Art Unit: 1618

Claims 11-58 are presented for examination.

The remarks filed on November 17, 2006 have been received and entered.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 11-58 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cagle et al. (U.S. Patent 6, 395,746).

Art Unit: 1618

Cagle et al. teach the generic formula, which covers the antibiotic moxifloxacin claimed herein. See column 2, formula 1 and column 3. The ophthalmic and otic use of such agent is also taught by the above reference. See column 2, lines 11-38. The primary reference differs from the claimed invention in specifically teaching moxifloxacin. It would have been obvious to a person skilled in the art to use specie within the genus of compounds for the same purpose as the genus. One skilled in the art would have been motivated to employ the teachings of the above reference, since it relates to the use of the genus of compounds encompassing moxifloxacin. Applicant has presented no evidence commensurate in scope with the claimed language to establish the unexpected or unobvious nature of the claimed invention, and as such, claims 11-58 are properly rejected under 35 U.S.C. 103.
